

Using Enterprise Architecture to align your IT Budget to Business Deliverables

As we venture further into the 21st century, Technology needs to be responsive to changes in the business landscape. The speed of response will ultimately determine whether a business experiences success or failure. The paradigm of IT delivery is a constantly changing landscape. The Cloud, as a service, offers increasing mobility to a now globally connected workforce; it is revolutionising the way IT is developed, built and served to customers at all levels.

To keep up, Business expects to pay for what it needs, and only when it needs it. The days of bloated global outsource companies stacked with a legion of ineffective project managers are coming to an end.

If you can have an application platform available only when you need it, then can this same on-demand approach be applied to your skills resources? Respiro focuses on aligning IT requirements with business needs; we are there when you need us.

Contact one of our consultants at Respiro Pty Ltd today to discuss your business requirements.

IT Strategy & Architecture

Through IT Architecture Consultancy, Respiro will identify and provide an independent review of the current strategy or solution designs.

It will run a series of Architecture Compliance Assessments to audit how proposed solutions will fit, or identify how current practises are tracking to conform to the architecture roadmap.

This targeted approach will provide a business with a clear direction for their future IT strategy.

Technology Consulting

Respiro specialise in ICT infrastructure and have extensive experience in Australia's major financial institutions and utilities. Areas of focus include:

- Security
- Network
- IP Telephony
- Storage & Backup
- Cloud
- Virtualisation

This experience can be applied at all stages of a project lifecycle.

- Requirements Analysis
- Architecture Scope and Brief
- Solution Design
- Architectural Compliance

Operational Process and Governance

Operational process review and development is a Respiro service that is targeted at implementing effective change, incident and problem management. This is based on ITIL but with a focus on keeping the business running and not strangling it.

With the creation of an Architecture Governance framework to oversee in-flight and future IT projects, Respiro ensures that the alignment between IT and business is preserved.

Solution Partners

Respiro has aligned itself with a number of trusted partners to provide the framework for solutions and strategies. These include, but are not limited to:

- Forgerock
- SupaTOOLS
- United Planet
